

KOPPINEEDI VAMSI LAKSHMI SATYA KUMARI

Cybersecurity Student | Network Security | Threat Analysis
+91 9347596398 | vamsilakshmisatyakoppineedi@gmail.com

SUMMARY

Cybersecurity graduate student with hands-on training in network security, SOC operations, and threat analysis. Proficient in security tools (Nmap, Wireshark, Kali Linux), network protocols (TCP/IP, firewall management), and incident response procedures. Strong problem-solving and analytical skills demonstrated through cybersecurity simulations and practical projects. Seeking a role as a Cybersecurity Analyst, SOC Analyst, or Network Security Engineer.

EDUCATION

Godavari Institute of Engineering and Technology, Andhra Pradesh

B.Tech - Cybersecurity | CGPA: 8.96/2024 - 2027

B.V.C Institute of Technology & Science, Amalapuram, Andhra Pradesh

Diploma - Computer Science and Engineering | Score: 83.09% 2021 - 2024

Mahatma Gandhi Municipal High School, Amalapuram, Andhra Pradesh

SSC (10th Grade) 2021

SKILLS

- Security Tools and Protocols - Nmap, Wireshark, Kali Linux, Firewalls, TCP/IP, Network Monitoring
- Programming Languages - Python, Java, C, C++, SQL
- Web and Backend Technologies - HTML, CSS, JavaScript, Node.js, Angular, Spring Boot
- Cybersecurity Specialization - SOC Operations, Threat Analysis, Incident Response, Network Security

PROJECTS

Port Scanner and Network Reconnaissance Tool 2025 - 2026

Python | Network Security | Port Enumeration

- Developed a Python-based port scanner to identify open ports and active services on target machines.
- Implemented socket programming for port enumeration with support for custom port ranges and service identification.
- Demonstrated network reconnaissance techniques essential for security audits and penetration testing.

Wireshark Packet Analysis and Network Traffic Inspection 2025 - 2026

Wireshark | Network Protocols | Packet Inspection

- Captured and analyzed network packets to understand protocol behavior and data transmission patterns.
- Identified suspicious traffic patterns and potential security threats through packet inspection.
- Built foundational knowledge in forensic analysis and real-time network monitoring.

SOC Log Analysis and Security Event Correlation 2025 - 2026

SOC Operations | Log Analysis | Threat Detection

- Analyzed security logs from multiple sources to identify suspicious activities and potential security breaches.

- Correlated events across different systems to detect advanced threats and anomalous behavior.
- Documented findings and recommendations for incident response and threat mitigation.

CERTIFICATIONS

- CCNA: Introduction to Networks & Enterprise Networking, Security, and Automation | Cisco Networking Academy
- Python Essentials 2 | Cisco Networking Academy
- Tata & Deloitte Cybersecurity Simulation Programs | Corporate Security Training

ACTIVITIES AND ACHIEVEMENTS

- Participated in cybersecurity internship at DataValley, gaining practical experience in SOC operations and threat analysis.
- Completed advanced training in network security monitoring, incident response, and threat intelligence.
- Demonstrated strong analytical and problem-solving skills through cybersecurity simulations and hands-on projects.
- Developed time management and collaboration skills by balancing academic coursework with technical pursuits.
